

Shared three-run material cohort: coverage and policy distributions

Shared cohort $n = 365$. Bars: parseable artifacts (gray), complete provenance (blue). Lines: Q1 (gray dashed), median (blue), Q3 (orange).

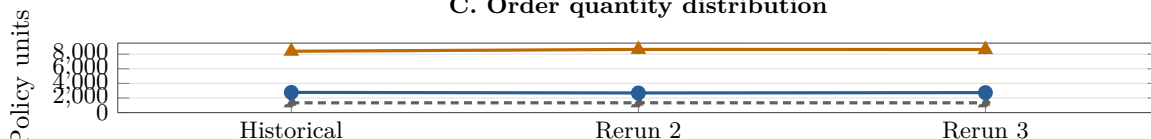

A. Shared-cohort artifacts and complete provenance

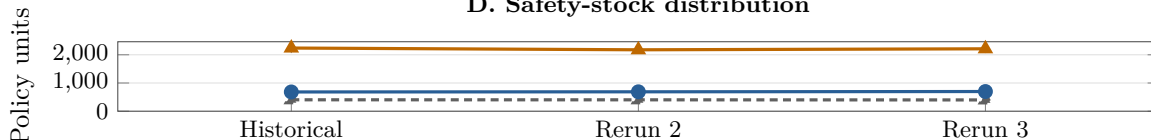

B. Reorder point distribution

C. Order quantity distribution

D. Safety-stock distribution

All panels use the shared three-run material cohort ($n=365$). Historical values are descriptive only: its exact deployed configuration was not preserved. Current reruns: 359 provenance-matched policy pairs; 38 exact numeric triples.
